2 Product Overview

2.1 Product Feature Highlight

abTouchPhone's Minimalism stylish design mixed with metal and anti-fingerprint glass could be displayed sophisticatedly on an executive's desktop.

Other features include:

- Three HD voice speakers for conferencing
- Built-in Bluetooth handset for private talk
- An adjustable HDR wide-angle camera
- Dual noise reduction microphones
- A colorful anti-reflection/anti-fingerprint touchscreen
- An HDMI port that allows you export screen to a projector
- Supports video conferencing calls
- Supports both Ethernet & Wi-Fi connection

2.2 Design Feature Highlight

Design Quality:

The user centric design of the abTouchPhone 100% reflects current user behavior in the office; the large touchscreen on this phone is to replace multiple buttons, the built-in beam forming microphone array collects sound around itself, so an user is not limited to his/her seat and can move around freely in hand free mode.

Degree of Innovativeness:

abTouchPhone is the first ever all function multimedia touch screen desk phone that supports abPBX, it replaces the traditional office desk phone which supports voice calls only. abTouchPhone's Minimalism stylish design mixed with metal and anti-fingerprint glass could be displayed sophisticatedly on an executive's desktop.

Originality:

abTouchPhone's Minimalism stylish design mixed with metal and anti-fingerprint glass could be displayed sophisticatedly on an executive's desktop. It covers both private talk and also the conferencing scenario in one sophisticated device.

5 Regulations and safety notices

Federal Communications Commission (FCC) Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Operation conditions

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Caution

Changes or modifications not expressly approved by the approved by the part responsible for compliance could void the user's authority to operate the equipment.

RF Radiation Exposure Statement for abTouchPhone

This Transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body.

RF Radiation Exposure Statement for Headset

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. End users must follow the specific operating instructions for satisfying RF exposure compliance. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
